-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

**Restriction to one of the following inventions is required under 35 U.S.C. 121:**

- I. Claims (none) drawn to Adenines, classified in class 544, subclass 277.**
- II. Claims (none) drawn to Guanines, classified in class 544, subclass 276.**
- III. Claims (none), drawn to thymines and uracils, classified in class 544, subclass 312.**
- IV. Claims (none) drawn to Cytosines, classified in class 544, subclass 317.**
- V. Claims (none), drawn to Others, classified in class 544 and 546, subclass various.**

**The last group include choices such as halopurines, Xanthines, hypoxanthines, assorted other unfused pyrimidines, imidazopyridines, pyrrolopyrimidines, benzimidazoles, etc.**

**Claims 1-6 link all the groups and will be examined to the extent that these read on the elected invention.**

**The inventions are distinct, each from the other because of the following reasons:**

**Groups I-V are distinct as seen by their marked structural differences. Guanines, Cytosines, etc are considered separate types of compounds, and these different in the number of rings present and the number and nature of the heteroatoms present. These are well recognized as being markedly different in their biological effects. For example, AZT is an effective anti-AIDS drug, but if the thymine is replaced by adenine, cytosine, etc, there is no effectiveness. Similarly, if the guanine in Acyclovir or carbovir is replaced by uracil, a 6-halopurine, etc, the effectiveness is lost.**

Art Unit: 1624

**In the event that the last group is elected, as single choice for the variable B must be made.**

**Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.**

**A telephone call was made to Mr. Amernick on 2/22/2006 to request an oral election to the above restriction requirement, but did not result in an election being made. A written restriction was requested.**

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

**The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.**

**Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.**
